Communication between two parties only happens when the message is Sent, Received, Understood and Acknowledged. Everything else is just noise.

SEPTEMBER, 2007

SIMULATED EMERGENCY TEST

Plans are now under way for our groups annual Simulated Emergency Test, (SET). The September meeting will have some information on this, but of course not all details will be released until the actual day of the test.

Please try and attend this meeting if you are intending on participating in the SET.

PACKET UPDATE

As reported last newsletter the Oakville KA-Node has been finished and operating out of VE3OGP's QTH awaiting final installation at the repeater site. It has a PBBS and will also operate as a digipeater. The Oakville LAN will operate on a frequency of 145.750 MHz.

The regional KA-Node, VE3HAL-7, is now operational from the same location, pending finding a permanent location. These nodes will operate until full function nodes can be built and coordinated into a full packet system.

*****REMINDERS*****
